

BOXER SPIRIT

WHERE PAST MEETS FUTURE

Wunderlich R 18 »RockBob«

Our latest concept bike tells a story – a story of minimalism and style. The challenge of transforming the R 18 into a bobber was evident to our designer Nicolas Petit. Following the R nineT-based interpretation, the topic has previously caused quite a stir and achieved notorious status. When a puristic design is fused with the essence of coolness, nonchalance, and audacity, it's time to rediscover the R 18. The boxer engine, which is atypical for a bobber, was skillfully integrated with specially developed components down to the smallest detail. With the RockBob, Wunderlich has achieved milestones of BMW traditions, combining stylistic elements typical of the bobbers of the Rock era and staging them expressively and convincingly with the superb standards of Wunderlich. The RockBob radiates an impressive quality impression that is somewhat unusual for bobbers. The result successfully underlines stylistic independence and high recognition value. An all-round breath-taking appearance, and not just in terms of detail!

All components for the RockBob

Item-No.	Product
18090-000/002/003	Custom Front fender, aluminum, high-quality matte black paint, tone in tone with shiny double lining
11810-000	Handlebar End Mirror (for Original Handlebar)
