WHERE PAST MEETS FUTURE

## Wunderlich R nineT »Daytona Black«

Our R nineT DAYTONA is based on the R nineT model. Its black paintwork quotes the defining designing elements of the classic BMW machine which up until 1969 had been available in any colour – as long as it was black – refined with their white, unmistakable lining all of which was applied manually using special brushes.

Our DAYTONA was named after the instrument fairing, the so-called S-type cockpit from which it was stylistically adapted. As the first fairing ever mounted to a handlebar fitted as standard, it made its debut on the legendary R 90 in the mid-seventies. The DAYTONA fairing combines style and protection from air vortexes and turbulence with elegant ease. The overall appearance is emphasized by a simply beautiful humped single seat in combination with one of our various rear end designs.

The R nineT DAYTONA finished in black is equipped with our perfectly integrated components: The DAYTONA fairings available with screens in clear or smokey grey, offered as sport or sport-touring variant are followed by our Mammut tank bag suits which entirely round up the machine's classic impression. Both our valve cover and cylinder protectors blend in perfectly with the sporty elegant appearance of our black DAYTONA. Thanks to our revolutionary VARIO Paralever bar allowing continuous adjustment, riding dynamics and vehicle height are variable.

Further chassis options can be implemented with components from the Wunderlich suspension program ‚plug and play‘.
