

# BOXER SPIRIT

WHERE PAST MEETS FUTURE

## Remember the SixDays

### Our interpretation of the R nineT

At »Glemseck 101«, one of the most popular bike events in Europe, we presented our Scrambler »SixDays«. The machine is now available as a complete unit, though all parts can also be obtained individually. The Scrambler built in SixDay style is a tribute to original BMW machines from the Seventies.

With its minimalist headlight cover, the extra spotlight mounted to the crash bar, the spoke wheels fitted with motocross tires, and its short rear and broad endure handlebars, this Scrambler appears ready for challenging use off the beaten track. The icing on the cake are the license plate holder, start number plates and the raised front mudguard. And of course, neither the reliable Wunderlich engine and cooler protectors, nor the ergonomic, multi-adjustable levers for clutch and brake are lacking.

The chassis of the »SixDays«, however, proves that we are totally serious about this tribute to BMWs successful off road racers. The multi adjustable fork cartridge in combination with the rear shock allows individual set ups awarding the R nineT-Scrambler with a perfect handling, more ground and banking freedom as well as better maneuverability on any terrain. All components are available directly from us or our dealers. The machines of our customers can be individually modified in our service centers.
