

BOXER SPIRIT

WHERE PAST MEETS FUTURE

Wunderlich R nineT »WunderBob«

The task faced by our designer Nicolas Petit of developing a Bobber with a BMW Boxer engine was a challenging one. Why? Because Bobbers are mostly built based on narrow, diagonally installed twin-cylinder V or series engines, which come with far fewer construction and design limitations than the lengthwise installed Boxer purely due to the spatial positioning of the footrests. We developed the R nineT into a Bobber that represents a contemporary interpretation and doesn't hide the appearance of the R nineT. Our WunderBob is a stand-alone machine that offers outstanding design as well as decent power and unmatched, agile handling – this means it has all of the ingredients you need for a reliable, honest friend and companion. Our customers are impressed and it has generated immense positive attention among international journalists and in the trade press.
